Table with 4 columns: Peripheral, Blood, Product, Day 1, Day 2. Rows: Red, Yellow, Green, Purple.

Packing instructions for transportation: Shipping Temperature : °C
Special requirements :

Regarding the donor designated above, I verify that the ABO type, degree of HLA match, and test results are acceptable to proceed with PBSC collection for above patient. All necessary IRB approvals are in place for this patient. I also accept the fact that the quality of the first collection of PBSC may deteriorate, if it is to be delivered with the second collection on the following day.
